Assessment of Agricultural Suitability

The Commission assessed whether external factors such as encroaching non-farm development have caused or will cause the land to become unsuitable for agriculture. The Commission does not believe there are external factors that render the land unsuitable for agricultural use. The Commission noted that the subject property is divided by a road. However, the Commission does not believe that the road renders the property unsuitable for use as a single unit.

Assessment of Impact on Agriculture

The Commission also assessed the impact of the proposal against the long term goal of preserving agricultural land. The Commission, when it considers applications for subdivision generally takes the view that subdivision is not consistent with long term agricultural activity and productivity. The Commission believed that the subject parcel has more agricultural potential as a single unit and that subdivision would negatively impact the agricultural opportunities available to the subject property in the long-term. In this case the Commission believes that any subdivision of the property will have a negative impact on agriculture.

Conclusions

1. That the land under application has agricultural capability and is appropriately designated as ALR.
2. That the land under application is suitable for agricultural use.
3. That the proposal will impact agriculture.
4. That the proposal is inconsistent with the objective of the *Agricultural Land Commission Act* to preserve agricultural land.
