

Data source - the original 1:50,000 agricultural capability maps from the ALC office were scanned, geo-referenced and then digitized in a geo-database format.

The data is to be used at a scale of 1:50,000 or smaller (i.e. 1:20,000 wouldn't be recommended).

The layer contains two attributes: CC = current agricultural capability and IC = improved agricultural capability.

The Agricultural Land Commission assumes no liability or responsibility for the quality, content, accuracy or completeness of data.
