Fort St. John, BC V1J 4M7

Dear Mr. and Mrs. Whitford:

Re: Application to Subdivide land in the Agricultural Land Reserve

Please find attached the Minutes of Resolution # 523/2007 outlining the Commission's decision as it relates to the above noted application.

This letter also acknowledges your confirmation, in a letter dated October 13, 2007, that you are not longer asking for permission to build a second dwelling on the portion of the property that you wish to keep. This aspect of the proposal was not discussed at the site visit and the Commission did not consider this request when it made its decision on the application.

Please send two (2) paper prints of the final survey plans to this office. When the Commission confirms that all conditions have been met, it will authorize the Registrar of Land Titles to accept registration of the plan.

Yours truly,

PROVINCIAL AGRICULTURAL LAND COMMISSION

PLAN 24633

Context

The proposal was weighed against the purposes of the Commission as stipulated in section 6 of the *Agricultural Land Commission Act* (the "Act"). They are:

1. to preserve agricultural land
2. to encourage farming on agricultural land in collaboration with other communities of interest, and
3. to encourage local governments, first nations, the government and its agents to enable and accommodate farm use of agricultural land and uses compatible with agriculture in their plans, bylaws and policies.

Discussion

Assessment of Agricultural Capability

The Commission noted that the property had partially been cleared for agricultural use and that the applicant had plans to further develop the property. The Commission also noted that the subject property was in an area that has traditionally been farmed. The Commission believes that the subject property has agricultural capability and is correctly designated as ALR.

Assessment of Agricultural Suitability

The Commission assessed whether the external factors such as encroaching non-farm development have caused or will cause the land to become unsuitable for agriculture. The Commission noted that the property lay between two areas that have been considered in planning reviews in the area. The land immediately to the east lies outside the ALR and has been subdivided into small 2-4 ha lots. To the west is the "Tea Creek" area, which has largely been endorsed for future rural residential subdivision in current planning document. However, much of the Tea Creek area remains in large holdings. The Commission does not believe that the subdivision that has occurred thus far renders the subject property unsuitable for agricultural production.

Assessment of Impact on Agriculture

In its discussion with the applicants the Commission addressed the possibility of the portion of the property proposed for subdivision being purchased (and consolidated) by the owner of an adjacent small lot. If the property owner is willing to purchase this portion of the property and legally consolidate it with his current parcel no new homes would be built, the number of parcels would remain constant, and the access road proposed for the north end of the property not be constructed. The Commission considered this option to offer a benefit to agriculture.

Conclusions

1. That the land under application has agricultural capability and is appropriately designated as ALR.
2. That the land under application is suitable for agricultural use.
3. That the negative impact on agriculture of the creation of a new lot would be mitigated should the boundary be adjusted between two properties creating a new lot of approximately 18 ha.

IT WAS

MOVED BY: Commissioner Kendrew

SECONDED BY: Commissioner Craven

THAT the application be refused as proposed.

AND THAT the Commission allow the subdivision of ~16 ha from the 32.2 ha property subject to the consolidation of the 16.2 ha area by legal survey with the adjacent property partially described as Rem Block A, Plan 12630.

AND THAT the Commission does not give approval for the construction of a 0.82 ha access road on the north side of the property.

AND THAT the subdivision must be completed within three (3) years from the date of this decision.

This decision does not relieve the owner or occupier of the responsibility to comply with applicable Acts, regulations, bylaws of the local government, and decisions and orders of any person or body having jurisdiction over the land under an enactment.
