In assessing agricultural capability, the Commission refers in part to agricultural capability mapping and ratings. The ratings are interpreted using the Canada Land Inventory (CLI), 'Soil Capability Classification for Agriculture' system, or the BC Land Inventory (BCLI), 'Land Capability Classification for Agriculture in B.C.' system.

The agricultural capability of the soil of the subject property is

Class 2 – Land in this class has minor limitations that require good ongoing management practices or slightly restrict the range of crops, or both.

Class 4 – Land in this class has limitations that require special management practices or severely restrict the range of crops, or both.

Subclasses

| M | soil moisture deficiency |
| C | adverse climate |
| P | stoniness |
| T | topography |

Assessment of Agricultural Suitability

The Commission assessed whether external factors such as encroaching non-farm development have caused or will cause the land to become unsuitable for agriculture. The Commission does not believe there are external factors that render the land unsuitable for agricultural use.

Assessment of Impact on Agriculture

The Commission also assessed the impact of the proposal against the long term goal of preserving agricultural land. The Commission recognizes that the property has some limitations for agriculture (as noted above) but believes the proposed subdivision would further limit the property for agricultural use. Also the Commission believes the proposal would impact existing or potential agricultural use of surrounding lands.

Conclusions

1. That the land under application has agricultural capability and is appropriately designated as ALR.
2. That the land under application is suitable for agricultural use.
3. That the proposal will negatively impact agriculture.
4. That the proposal is inconsistent with the objective of the *Agricultural Land Commission Act* to preserve agricultural land.

IT WAS

MOVED BY: Commissioner Dowswell
